DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 22-31, drawn to a method, classified in class 430, subclass 313.
 - II. Claims 32-40, drawn to a device, classified in class 257, subclass9+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the device as claimed can be made by another and materially different process such as an non-photolithographic process whereby the material is deposited.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized

elected invention, the inventorship must be amended in compliance with 37

CFR 1.48(b) if one or more of the currently named inventors is no longer an

inventor of at least one claim remaining in the application. Any amendment

of inventorship must be accompanied by a request under 37 CFR 1.48(b)

and by the fee required under 37 CFR 1.17(i).
